

Python Classes in Pune

PYTHON

```
class Person:
    def __init__(self, name, address):
        self.name = name
        self.address = address

    def __str__(self):
        return f'Person({self.name}, {self.address})'

class Student(Person):
    def __init__(self, name, address, marks):
        super().__init__(name, address)
        self.marks = marks

    def __str__(self):
        return f'Student({self.name}, {self.address}, {self.marks})'

class Teacher(Person):
    def __init__(self, name, address, salary):
        super().__init__(name, address)
        self.salary = salary

    def __str__(self):
        return f'Teacher({self.name}, {self.address}, {self.salary})'

# Example usage
p = Person('John', '123 Main St')
s = Student('Alice', '456 Main St', 85)
t = Teacher('Bob', '789 Main St', 10000)

print(p)
print(s)
print(t)
```
